DETAILED ACTION***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "228" and "16" have both been used to designate the same item in figure 1. The same can be said for (24, 222), (32,214), (16, 216), (30, 224). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: page 14, line 4 the specification identifies "robotic mechanism 230". However, the numeral 230 does not appear anywhere in the drawings.

Appropriate correction is required.

Claim Objections

Claims 94,96,103 are objected to as being improperly dependent.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,47-64,70-81,86-97,99,100,103,104,124-127 are rejected under 35

U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of the claims identifies the invention as an apparatus. However, the body of the claims defines the elements of the apparatus not by their structure but by the function they perform (see claim 1, "a mechanism for incubating...").

The rules require (37 CFR 1.75 (d) and MPEP 2181) that if applicant chooses to define a device by it's function instead of it's corresponding structure applicant must use the proper format (means-plus-function) and it must be clearly described in the specification what structure corresponds to the specific function being claimed.

In the instant claims "mechanism for automatically determining"; "a mechanism for individually controlling"; and "a mechanism for individually tracking and identifying" do not comply with this requirement. Applicant needs to use the proper "means-plus-function" language and identify in the specification what structure corresponds to the specific "means-plus-function" element.

Response to Arguments

Applicant's arguments filed 1/6/06 have been fully considered but they are not persuasive. Applicant argues that the specification provides the proper support for the claimed means – plus – function language. The examiner agrees with regard to the “means for incubating” and the rejection for that language has been withdrawn. However for the remaining rejected means plus function language the examiner disagrees.

The Federal Circuit has held that applicants (and reexamination patentees) before the USPTO have the opportunity and the obligation to define their inventions precisely during proceedings before the PTO. See *In re Morris*, 127 F.3d 1048, 1056–57, 44 USPQ2d 1023, 1029–30 (Fed. Cir. 1997) (35 U.S.C.112, second paragraph places the burden of precise claim drafting on the applicant); *In re Zletz*, 893 F.2d 319, 322, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989).

It is not clear from the specification which structure or equivalents thereof, corresponds to the “means for automatically determining”; “means for individually controlling”, “means for individually tracking and identifying”.

“If one employs means plus function language in a claim, one must set forth in the specification an adequate disclosure showing what is meant by that language. If an applicant fails to set forth an adequate disclosure, the applicant has in effect failed to particularly point out and distinctly claim the invention as required by the second paragraph of section 112.” *In re Donaldson Co.*, 16 F.3d 1189, 1195, 29 USPQ2d 1845, 1850 (Fed. Cir. 1994) (in banc).

Allowable Subject Matter

Claims 114-123 are considered to be allowable over the prior art of record.

Claims 1,47-64,70-81,86-97,99,100,103,104,124-127 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
